

## Weekly activities

Week Commencing 20<sup>th</sup> April 2020

# Class 12

### English and Communication

Either read the instructions for your soup recipe to a member of your family or carers and tell them how we make it in Soups'n'Spuds.

Or use Makaton to sign how we make our soups.

Practice your Makaton signs and words that we put into your home activity files every day for 20 minutes and readers please find another recipe to try with your family.

### Physical Education

Go out into the garden and help to cut the grass if you are able or pull some weeds or dig over the soil in a veg patch.

Use the lawnmower, spade, or trowel safely.

Wear gardening gloves and wash your hands properly when you come back inside.

Plant some seeds either from a packet or that you have saved from fruit that you have eaten or vegetables that you have prepared for your soup.

### Message from Class teacher

Hi Class 12,  
Hope you and your families are all keeping well.  
Here are some activities for this week. Have a go at each activity and if you can take photos so we can share them when we all meet up again that would be great. But most of all keep active, take care, keep safe and keep smiling.

### Interactive Video Activity

See the Cashing In link on the class page.

### Life skills

Make one of the soup recipes that I sent in your home activities file.

Remember our cleaning routine before you start to prepare the vegetables.

Have a look at the recipe and gather all the ingredients and equipment needed to make the soup.

Work with a family member or carer.

Use equipment such as knives, peelers and the hob safely.

### Maths.

Do a survey of wildlife visiting your garden.

On a piece of paper use your crayons or felt pens to put a large dot, small line or mark for each one you see.

Use a different colour for each and if able draw a rectangle for each section.

Count how many birds you seen in 1 hour.

Count how many butterflies, bees, or other insects you see in 1 hour.
